There are small numbers of plants that are more difficult to grow and will be priced slightly higher. We are currently working on a price list for those.

All of our plants have been re-potted within the last four months. They have been given the best in potting soils and pot sizes. Each was treated with a natural product to make them more drought tolerant. You will not find any that are root-bound.

When planting, you'll need to include all of the potting material with the plant for best results. If you should get a plant that did not survive the extreme cold and wet spring, we will replace it or you may choose another product.

We will provide free delivery free within 10 miles of our nursery for orders of \$50 or more.

We will allow a nursery credit of \$.25 for each pot returned in good condition that was purchased from us.

Thanks!
